

BatterySafety.h

```
graph TD; A[BatterySafety.h] --> B[DAVE.h]; A --> C[../_HAL/GPIO.h];
```

The diagram illustrates the header file dependencies for BatterySafety.h. It is a hierarchical structure where BatterySafety.h is the parent header, and it includes two child headers: DAVE.h and ../_HAL/GPIO.h. The parent header is represented by a grey box, while the child headers are in white boxes. Blue arrows indicate the direction of the include relationship from the parent to the children.

DAVE.h

../_HAL/GPIO.h
